

Vermont Federally Qualified Health Centers

Vermont Federally Qualified Health Center:

- 7 Federally Qualified Health Centers, operating 29 sites

These health centers and clinics served as medical home for approximately 82,000 patients who made over 351,500 visits in 2007.¹

Vermont FQHC Payor Mix:

In 2007 the FQHCs were the medical home for 20% of Vermont's 105,152 Medicaid beneficiaries² and served 19%, or 11,876, of the estimated 63,639 uninsured Vermonters. 14% of the state's 96,532 Medicare (and dually eligible Medicare/Medicaid) beneficiaries receive their care from Bi-State member health centers and clinics. Bi-State members served 13% of the state's 358,586 commercially insured lives.

¹Data is self-reported by centers and is subject to change. Information in this document is based on best available data at the time of distribution.

² Covered lives information from *Health Insurance Profile of Vermont Residents 2001-2006*, September 20, 2007 Vermont Division of Health Care Administration.
